# Are You Eligible ?

## One time Income

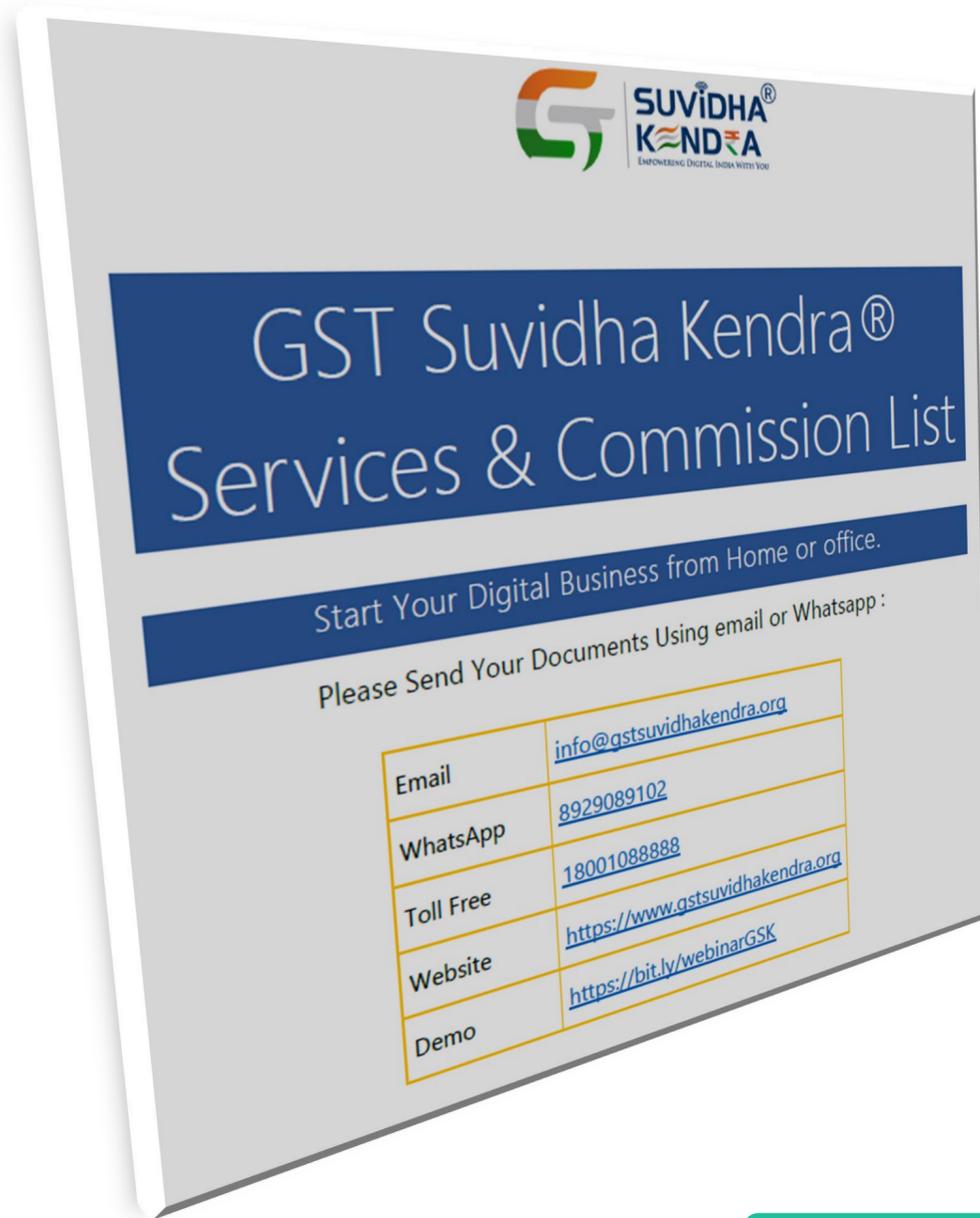

- Most of us are always behind income which is temporary in nature and used in day to day expenditure.
- Income flows till the time you are working or continuously running your business for longer terms.
- No recurring flow of money - It works only for those hours when you are working means if you encounter any issue in your life, you will not get income.
- One time income is needed to manage daily expenses.
- For such income, we need to always get fresh customers and business runs till the time you are able to get new customers ongoing basis.

VS

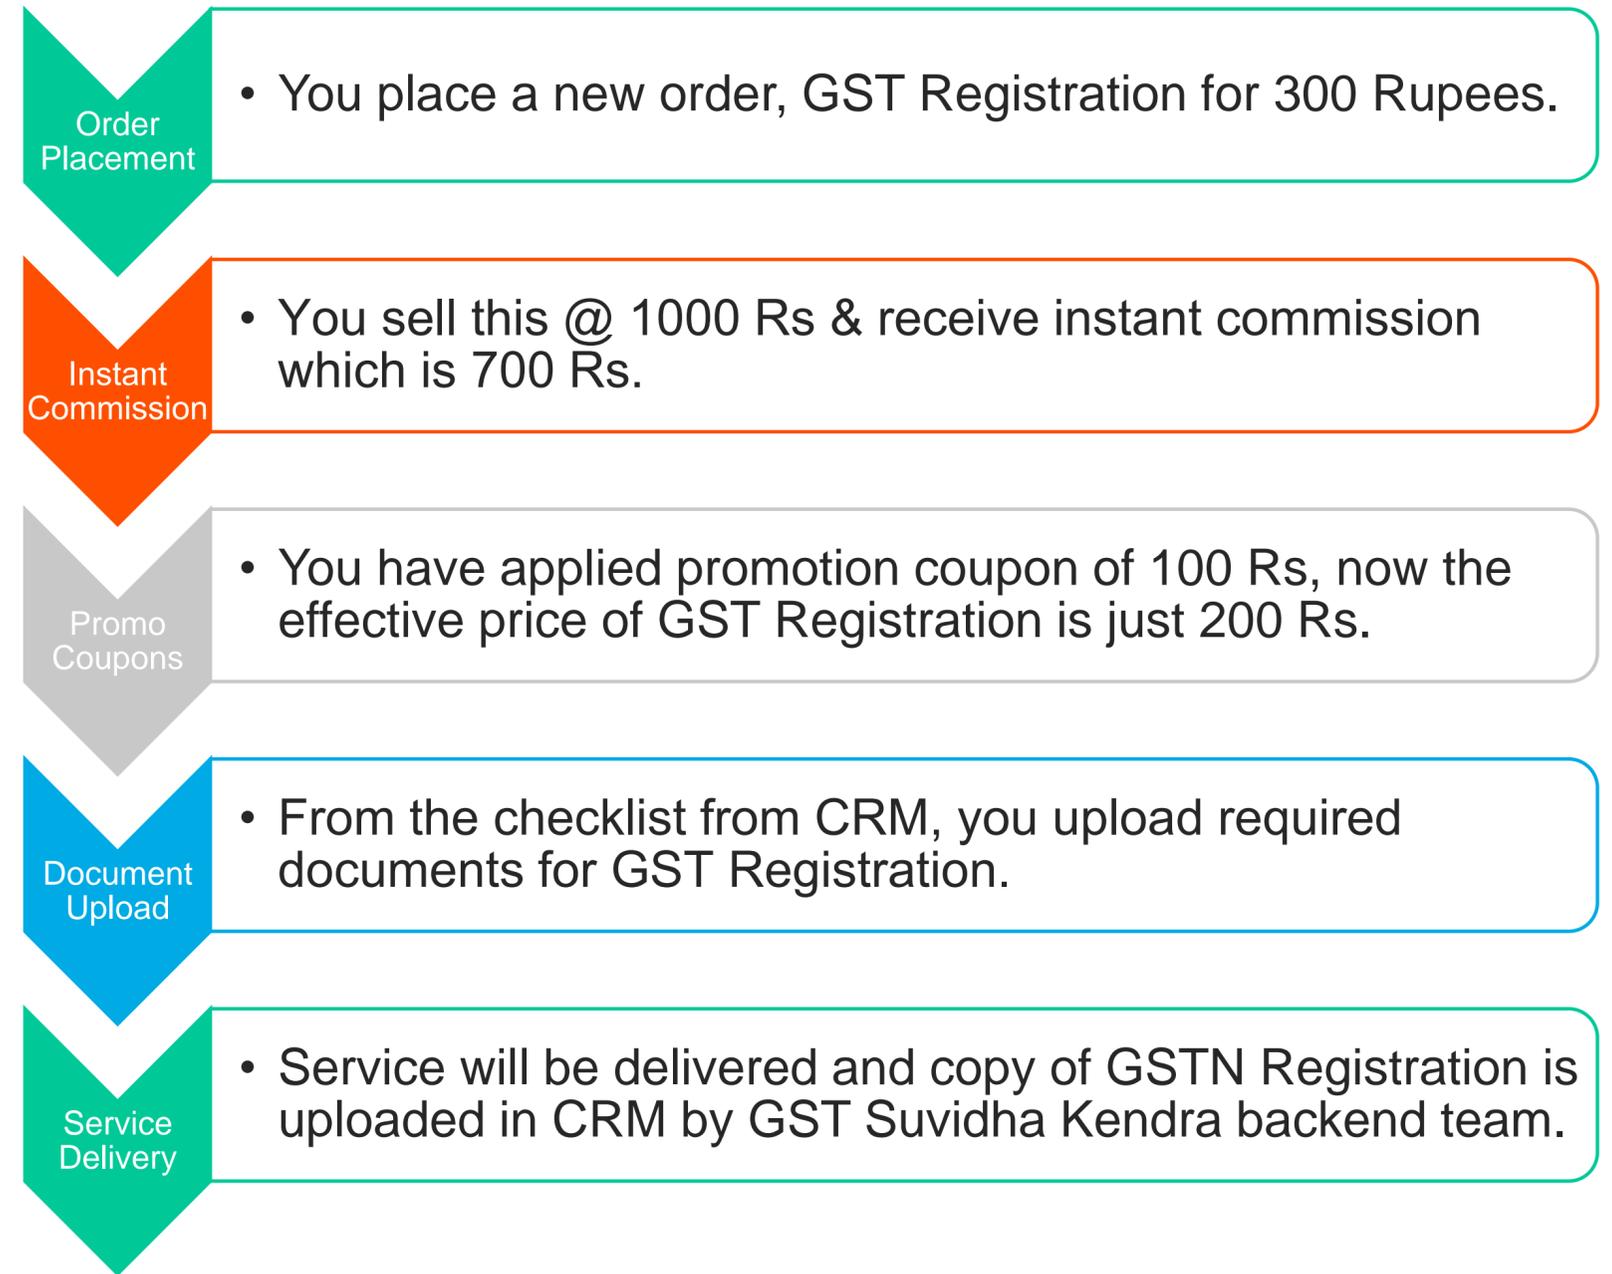

## Recurring Income

- Wealth is a permanent source of happiness. You earn money from your resources and keeps on increasing.
- Money flow remains same or higher even if you are not able to devote your regular hours to the business.
- Recurring money flow - Even if you are not available, your assigned family member or partners can be benefited if you know the difference between wealth and income
- The income flows slowly but multiply with time.
- Your customers are paying you monthly or quarterly basis so you need not to find too many customers everyday. You need to work upon relationship building for getting more business.
